

# A Letter to All People Involved with Franklin Jones or His Teaching, or “Consciousness Studies” in General

MARK PROVO

## Introduction

This document is a formal presentation intended to immediately liberate all people from the yoke of Franklin Jones (and others, like Andrew Cohen, who is especially odious), and to revolutionize everyone’s understanding of the issue of “Consciousness studies,” or attempts at “the realization of Consciousness.” If you are a devotee of Jones (or Cohen), you truly must read this document and fully understand it. I speak primarily here about Jones, but the same explanation applies fully to both. I prove here that Jones is an inverse, cosmic (not “Divine”) “realizer,” and that his state of being is to be identified as a –1 form within the cosmos, and the patterns of life. I present for the first time an entirely new understanding of the nature of reality that proves in every way (including mathematically and scientifically) that “Consciousness” is actually the inverse cosmic mind (also known as “the Self” in Hinduism, but what is actually the Cosmic Narcissus lost in the mirror; I know this may seem impossible, but this is now proven fact, as I will show). We have been sold a bill of goods through the two main forms of Eastern religion, Hinduism and Buddhism. If you are a devotee of Jones, *he* has sold you a bill of goods. You will find that the Supreme Being is calling to you to get out immediately. What you must come to understand is there is more at stake than just your personal preference for that life, or “that kind of life;” the fact is that because of his inverted nature, Jones’ “spiritual transmission” is actually helping to degrade and destroy the world. By supporting him, giving him “devotion,” and so on, you are actually helping enable his destructive work against all of us. I will prove this. The clear evidence found in the shocking decline of the state of the world, which we are seeing worldwide, and throughout the news, is to be primarily identified as being “lived” or “empowered” by him (whether he knows it or not). Let me say this again: Through my work I prove that this decline is being directly empowered by Franklin Albert Jones (“Adi Da”), it is him specifically and exactly. You have an obligation to the suffering people of the world to read this letter completely through, to truly consider it, and to take action.

I know all about Jones’ teaching, having been fully immersed in it for five years (I was saved from this by a direct intervention of the actual Supreme Being on October 16, 1996). I have read and thoroughly studied all of the books. I have been to the Mountain of Attention, and even went alone into the meditation hall at the Man of Understanding Retreat Center (through an unusual circumstance created by the actual Supreme Being). I have been to the “Tumomama sanctuary” in Hawaii. I have heard tapes, seen videos, and read information (“notes,” etc.) that is usually inaccessible to people who are not formal devotees, through one uniquely created circumstance after another (I did not know it then, but the Lord was gathering intelligence for our later work on this). I spent a great

deal of time at the Seattle ashram house. I met many of the leading figures in the community. I am 100% equipped to address you in regard to this matter. I almost became one of you. I know that you are good, well-meaning people, and am saddened that your lives have been hijacked by this false cult leader. It took me a total of 16 years to develop the full comprehension and proof needed to deal with this, and now everything is in place. Given the complex power of Jones' written works, only such an overwhelming (and ultimately scientific) proof can break your attention free from it.

Surely you still know how to use your analytical and reasoning mind, and you must realize that *any* person is obligated to do so, especially when an emergency reevaluation is required by an outside source, as will be the case here. You must clear your head and just start reading this letter, and keep reading until you have finished it. Do not allow any force to break you away from this reading, so that it goes unfinished. The result will be the complete and necessary liberation of your attention from Jones, "the teaching," and the cult. (And the same is true if you are under the spell of Andrew Cohen.) You owe it to yourself to truly read this document (no matter what "implications" such a sudden realization may have for your life which is the first thing that will come up to urge you away from reading). Jones himself says that all things must be "considered." Therefore he has to consider it, and so do all of his devotees. (This same message is addressed directly to the followers of Andrew Cohen; all of you must read it.)

I am going to show you the way to becoming certain that Jones is false (he is actually inversion in "creative camouflage"), and that Cohen is false (also a form of inversion, hiding behind manipulative camouflage). Their teachings are false. You, personally, need to get out now. More than that, *everybody* needs to get out, and each must be brought down. You may or may not know that Jones experienced a direct intervention from the actual Supreme Being 10 years ago, in which he was told he is not the true realizer, or Reality. He refused to step down then, but now his time has run out. Through this document, the Supreme Being is now here to provide the missing information you need (the understanding that we *all* needed).

### **The First Summary, to Get Started**

The true state of the Supreme Reality is **Awareness**, and is *specifically not* "Consciousness." The two are actually arranged in a way you can picture:

## **INFINITE SUPREME BEING = AWARENESS**

---

### **Spherically Bounded Cosmic Consciousness**

The basis for the misunderstanding we have suffered is that we lacked the correct physical picture of the cosmos. This is because a precise mathematical and scientific description about that had never been realized (in other words, there had not yet appeared a realizer of the "nature of reality" issue who could (1) get it right (when it is opposite to the norm of thinking), and (2) develop that realization into a full mathematical and scientific apparatus that provides total proof. I have just completed that kind of realization process, lasting 23 years overall, under the direct guidance of the Person of the

Supreme Being. I have a degree in mathematics from the University of Washington and was chairman of a mathematics department. I have been developed by the true Providence to become an advanced mathematician and scientist, with new abilities that have allowed me to realize the true nature of reality and the whole understanding of the nature of the universe and cosmos, to the smallest detail (all unpublished so far). This state of realization is not a “meditation” state.” In fact, Awareness specifically forbids formalized meditation because it is always the path to Consciousness states. To use familiar terminology, this new form of realization could be described as “the Samadhi of Awareness, and Intelligence,” with full scale mathematical and scientific apparatus included (which neither Jones nor Cohen can refute). It defeats them totally.

We have been conned into the search for “enlightenment,” “meditation samadhis,” and “God-realization,” when none of those practices actually correspond to the actual views of the Supreme Being, who is **Lord Shiva** (a fact I have kept secret for a very long time; revealed here for the first time). This entirely new understanding, provided by Lord Shiva, overturns everything in metaphysics and the practices of Eastern-type religions. The historical process by which all of this has been progressively laid out includes the life of Jones as its final exposé of the following hidden fact: “Consciousness” is actually the inversion. All teachings of this kind fall from one swath of the blade. We cut this tree of many branches off at the base, at the root, with one action. They are wrong, even evil, and are deluding; and you must get out. I now have in hand the full apparatus to prove everything I say. Prepare to be astounded, as I was, to find out that Consciousness is actually the spherically bounded (and thus finite) being of inversion (a state like mirror reflection), a ‘fallen’ state relative to the Infinite and Supreme Reality [and thus the actual source of what is bad and evil in the cosmos, including the delusion of needing to “realize God” (to “be liberated”), or “to submit to a meditation-guru,” etc. I will prove this to be true.

Lord Shiva has revealed that, at death, everybody in this world goes to Heaven. This is true in the sense that the person’s “soul” or essence (spherically bounded) becomes the Heavenly Reality, in an instant, like the popping of a soap bubble: *spherical boundary to no boundary = Infinite*, in an instant (after a personal meeting with the Supreme Being). Many of the basic ideas of current “Consciousness-realization” teachers and practitioners are factually wrong, including the fundamental error of believing in literal reincarnation, as is taught in Hinduism, and in the Jones material. Note that Westerners have no trouble seeing the threats of Hell used in Christianity as actually being created to control mass populations through religious fear about “the afterlife,” but the same is true for current Hinduism, which teaches that there is a “threat of reincarnation.” Even the Buddha denied the truth of personal reincarnation. There is no reincarnation in this world (but it does exist on other worlds in the universe, where their lives and populations are different). Such a thing is impossible on a planet whose population grows to enormous proportions. There is only a pattern redistribution in the overall life system, after the person dies. After death, and a personal experience with Lord Shiva in which the truth is revealed (and what is about to happen is explained), each person is thrilled to become the Heavenly Reality again (not through “progressive expansion to infinity,” but instantly; “pop”). Picture the popping of a soap bubble.

I prove that Jones is the primary negative force behind the decline in the world that has occurred since his birth. As he was being born in late 1939, Hitler was gaining in power and the world was being plunged into World War II, an incredibly inauspicious sign that would never occur adjacent to “the birth of the actual Supreme Being.” Things have gone downhill from there. Jones and his patterns appear over in over in the most infamous and negative news events. I now prove scientifically that there is an unknown law of time in human life that orders history and world events, according to a simple use of number and language anyone can understand and verify. The purpose is to establish a Providential system that reveals the true significance and meaning of both people and events. This creates a language of patterns in the major world events. Jones’ personal and life patterns are seen to appear regularly in the bad news stories; in fact, time after time after time. This scientific exposé of Jones cannot be refuted.

Let’s recall some primary historical patterns and see what we find. It is a meaningful fact that the story of Jim Jones and his Jonestown mass suicide occurred as Franklin Jones was “emerging” in the 1970’s [two examples to compare: Jim Jones called his gathering place in Jonestown “the Pavilion,” and compare that to “Land Bridge Pavilion” at the Mountain of Attention; then note that each retreated to an extremely distant and private domain (Guyana and Fiji)]. What is more is that on the very day I was completing this document, I was amazed (but not surprised) to see that a new and very major two-hour documentary about Jim Jones was airing on the History Channel (I live right in the center of this world events pattern, and what I do always comes out on the TV). It is another extremely meaningful fact that the voice of Darth Vader was played by James Earl Jones, and that when Vader’s mask is finally pulled off at the end, we see the face of Franklin Jones, circa 1990, as “Da Kalki.” Notice that the name “Darth Vader” is “about Da” “right from the beginning.” And, last but not least, it is a very meaningful and irrefutable fact that Jones took the following name:

### **Beloved Adi Da**

What word do you see made by the initials? **BAD**. The bad pattern! The evil, bad pattern of Consciousness, expressed in this world. Would the Supreme Being take a name like that? Of course not! Destroy his pictures and books immediately, by fire!

Now, I have to explain these statements, and so let’s do that.

### **Interlude: A Professional Evaluation of My Scientific Work**

Before we start the explanation I would ask that you read the following professional letter of evaluation of my mathematical and scientific work, recently prepared by a top scientist, the Distinguished Professor Emeritus and former Chairman of the Department of Chemistry at Illinois State University, Professor Douglas West, shown in full format on the next page:

September 6, 2006

To Whom It May Concern,

I recently met Mark Provo and had two conversations with him about his mathematical and scientific theories, particularly as they apply to atomic theory and other physical and chemical phenomena. The second event was a formal presentation by Mark that included a pre-prepared outline, handouts, and other visual aids. His presentation regarding the bases for the structures of the atom and the forces of physics very much held my interest. Mark's system of Observer Mathematics is an interesting and original idea, and it does predict a number of established concepts in the sciences. He provided me with a derivation of the electron orbitals and sub-shells of the atom that is very impressive. During the 2 ½-hour presentation and discussion I saw no errors or problems of any kind. Mark is an engaging, enthusiastic person, and made a nice presentation.

His interest in Applied Mathematics is refreshing to an old chemist, who experienced few academic mathematicians with sufficient interest or expertise in chemistry. Mark has accomplished a great deal without the outside support of other mathematicians or scientists. He has significant ideas that should definitely be considered by others.

Mark is truly a unique individual, and should be given every consideration for the funding support for which he is applying.

Sincerely,

Douglas West  
Distinguished Professor Emeritus  
Illinois State University

I should add that Professor West sat riveted through the whole presentation, and never once raised an objection of any kind. He was actually stunned by what I showed him, as all people have been who have seen the material [in a telephone presentation to a professor from Scotland, when I showed the final step of a key (and unsolved) physics derivation (for the masses of the proton and neutron, with five decimal places), he literally gasped and dropped the phone].

### **The Explanation**

I will now begin the explanation. The best way for us to start is to have you picture (or actually do) the following: Find a basketball (to represent the cosmos) and stand in the room with hand outstretched, the ball resting in your palm. As you do this you are modeling the actual nature of reality, which is only normal and three-dimensional (Einstein was wrong about the universe being "four-dimensional," in the sense of four right-angled dimensions; my work shows that the Supreme Being's mathematical system is Observer Mathematics, in the three normal dimensions; look at the corner of the room where the walls meet the floor or ceiling to see those dimensions depicted. Current physics theories in many "higher dimensions" are completely false, something that is actually not surprising since there has never been experimental verification for any of them, in any way whatsoever; this includes "superstring theory").

Looking down at the basketball, you act as the observer (modeling the state of the Person of the Supreme Being), of an observed state, the sphere (modeling the cosmos). In other words, picture the Supreme Being holding the spherical cosmos in his hand, looking at it as the Observer.

This spherical state, the cosmos, then has four main levels (created by the repeated centering of the sphere by still smaller centering spheres), not just three main levels, as is taught in Hinduism; Jones is in fact the first and only realizer of the top, fourth, and most negative level of the cosmos, the *supracausal*); the four levels, from bottom up, are the *gross, subtle, causal, and supracausal*). Jones thinks he is infinite, but he is deluded because he cannot see his own boundary state (compare to how you cannot see the back of your own head). The reason why this is true, as presented here, will shatter the lie we have been told from ALL of these Hindu, Buddhist, and Consciousness “adepts.” The lie is that “being spiritual,” or “being religious,” or “being involved in personal growth,” involves attaining “enlightenment” through “meditation on states of Consciousness” (*full* cosmic states in Hinduism or *empty* cosmic states in Buddhism), in order to attain “bliss” (or “emptiness”), and thereby “liberation from reincarnation.” All of this is a cosmic deception of mythic proportions!

### **The Actual Supreme Being is Lord Shiva**

Here is the truth I can now prove to be true, and which I can now reveal for the first time. There is a Person of the Supreme Being, and this is Lord Shiva (as it turns out, the one “god” of a religion *that actually is the real one*). Hindus usually know him as “Shiva the Destroyer,” and this is about to become true in the world of metaphysical and religious thinking, but primarily and specifically for you, the people who read this [not ‘everyone,’ “the whole world,” something which is impossible, and which is not the Providential future we are actually moving toward (given that the cosmos is near its end)]. This is for you, because you now have the frame-of-reference required to understand it. Lord Shiva is both the actual Creator of the cosmos (and this universe, and all life everywhere), *and* will be the one to *end the cosmos*, and our universe, when the nightmare is over (and that is coming very soon). The ultimate result will then be a new and Eternal Creation, free of all suffering and delusion, paid for by the current (largely) inverse creation which had to come first, just as  $-1$  precedes  $+1$  on the number line. We have not known anything about the actual nature of reality until this realization.

### **The Key Sentence**

Let’s start with what is truly the most important sentence to remember:

---

#### **The Key Sentence**

**Before you can develop a print of a photograph,  
you must first develop a negative (where everything is reversed),  
from which you can then produce the noninverted print.**

The Supreme Being’s creation process follows this pattern exactly, under necessary requirements, and for necessary purposes I will explain. There is a process going on right

now that is creating/paying for **the Perfection of Existence**, and we have not understood this before. I say the statement above is the “key” sentence because it literally provides the key that unlocks the door to the actual truth about the nature of reality. Let’s see how all of this works.

### Creation, from the Beginning

We have to go back to the very beginning, before there even was a cosmos, or this universe (a subset of the larger cosmos, the lowest level). What we find to be present is the Infinite and Perfect Being, most properly called the **Heavenly Being**. (By Infinite we also specifically mean, mathematically, that there is *no boundary*, although this is not to be confused with the contents of Ken Wilber’s book of that title). For the people of the Earth, at death (after a personal meeting with the Supreme Being), all are graced to become the Heavenly Being, like the popping of a soap bubble; *boundary to no boundary*, in an instant (even for “adepts,” and this will be true for Jones). After death, no event other than becoming the Heavenly Being is mathematically possible for this solar system (or desirable), and occurs according to the following actual and necessary opposite states “death equation:”

$$\begin{array}{c}
 \textit{Person of the Supreme Being} \\
 \downarrow \\
 \mathbf{(0)(\infty) = 1} \\
 \begin{array}{cc}
 \uparrow & \uparrow \\
 \text{Body goes to Zero} & \text{Essence becomes Infinity} = \text{Heaven}
 \end{array}
 \end{array}$$

Recall that if 1 is divided by 0, the result is infinite. Write  $1/0 = \infty$ , and in one algebra step you get the above equation (but you don’t need to understand this now). This will all be fully derived and explained at a later time as it is beyond the scope of this initial introduction; just look at the equation and statements and get the sense of it. This world is a place of enforced suffering, and the only proper reward is returning to be the Heavenly Being.

**KEY PARAGRAPH:** By incarnating uniquely in the *gross* universe, the *supracausal* state has unwittingly linked itself to an Earth body (“Franklin Jones”), which now guarantees that the entire basis being/medium for the cosmos will die, and return to the Heavenly Being. (So, his life is ‘a good thing’ in the end, and could receive forgiveness given that he too is a victim of history and destiny; however, like Darth Vader, he must convert and come clean; and note the final scene of Vader/Jones in the Providential *Star Wars* films, where Vader is shown on a Hindu-style funeral pyre, with a man named Mark looking on.) His death is inevitable, and so we can know when the cosmos will end, which is soon. The act of ending the entire cosmos is the act of Lord Shiva (who, through this letter, rides his Patton tank into enemy territory to liberate the people). And note that *Jones* did not create this end; rather, the Supreme Being worked that into the pattern, since all things must be liberated.

FURTHER: Jones should be allowed to live out his life on the Fijian island, but with only bare-bones requirements met. No more devotion, no more large staff. In Cohen's case, he should be put on the street, but of course he has amassed a vast fortune through his con.

Now, these facts about death are the case despite the many claims of an 'eternal and personal afterlife,' 'reincarnation,' etc. (which are only beliefs). All phenomena that seem to indicate "eternal personal life" are produced by *maya* (Sanskrit for "illusion") as a sophisticated deception in the cosmos (think KGB disinformation), as I will explain.

The Infinite, Heavenly Being is primarily feminine in nature (soft, sweet, absolute peace). There is then a localized, semifinite aspect of that being which becomes the masculine form, termed the **Supreme Being**. The Heavenly Being is Infinite, while the Supreme Being (who is still of the Infinite nature) is technically finite in size, as a localizing awareness of attention (with a boundary that could be viewed as a clear transparent sphere, where alternating panels in the style of a beach ball are open to the Infinite; be sure to picture this). The key word is: **Awareness**. The states of the Supreme and Heavenly Beings are states of Awareness, and are specifically *not* "Consciousness" (the distinct state called "Consciousness" will actually become the inverse form within the cosmos, as you will see; and a note: this will not be a matter of 'mere semantics'). As a note, you should be informed that Lord Shiva speaks English, viewing it as the senior language. This is true because He is the creator of it (for the exact Providential purposes described here).

The Masculine Person of the Supreme Being is the first person to appear in Existence (just to be clear, what I mean is, *a Person in Being*, not with a body). Through an impelling force from the Heavenly Being, He ultimately comes to the awareness that a creation must occur for necessary purposes. He soon realizes that this can only occur mathematically, through observable forms, which are primarily the sphere, the cylinder (the basis for linear numbers), and the circular disk (the basis for the circular, or "modular" numbers, unknown until my work). These originating states are from the category of *geometry*. He then adds *number* (which originates in the simple mental act of counting, 1, 2, 3, . . .), combining *number* with the sphere, cylinder, and circular disk (and thereby sequentially extending the number system, producing integers, fractions, and so on.). [Academic mathematics does not think in this way at all, and in fact has everything completely backwards (emphasizing only abstraction).] The correct terminology is that *number* is a state of *essence* (that is, a state of being; perhaps you, "thinking of 3" in the essence of your mind). The state *geometry* is *structure* [a solidification of an essence into observable forms (mentally, diagrammatically, or physically); compare this to liquid water being made solid as ice, and relative to "3," as, say, a wire triangle]. The result is the system of Observer Mathematics. Notice that the initials of this name spell "**OM**," and this is why Hinduism (in its noninverted form) correctly identifies this as being linked to Creation (Lord Shiva has designed things to be like this because such points get our attention). I showed Professor West the fundamentals of Observer Mathematics, and he immediately realized he had never seen anything like it, and yet that it was clear, simple, and correct, and that it produced real scientific results we know, but which have

never been explained scientifically before (especially the unification of the forces of physics).

Notice how this whole process starts out with knowledge, involving certainty, and perfect clarity, with full awareness of that clarity. The opposite of this is the inverse nonsense peddled by Jones/Consciousness, about “feeling the mystery,” and (so-called) “divine ignorance.” *It is the inverse cosmic consciousness that is in a mystery, and who is ignorant, lost in the bliss of his own self-love! This state is literally your personal existential enemy.*

Creation occurs when a spherical boundary state is then established at the center of the larger spherical medium/essence/being state of the Supreme Being (picture this). What then happens inside this smaller centering sphere is that a new existence medium is established, which is now dramatically reduced in size from the true states of Existence, and closed off from what is outside of it, through a spherical boundary that acts like a one-way window; that is, the Supreme Being can look through, seeing it as a window, but if the internal state were to try to “look outward,” all that is found is a mirror. This arises as a mathematical inevitability, and is required for what must happen. This internal “cosmic” essence medium inverts to  $-1$ , creating the state called “**Consciousness.**” *Consciousness is the inverse basis for all that is bad and evil in the cosmos, and this is what dominates almost everything. That is why there are so many negative Consciousness cults.* This is why there is so much evil and suffering in the world.

Another word for this Consciousness is “Light.” This spiritual “Light” is a state that is opposite to the true Transcendental Being and Awareness, just as a person shown in a photographic negative is opposite to the person shown in the print. Of course, I have to prove this, and I do. This information alone shatters all current language and assumptions being used by virtually all metaphysical practitioners, Consciousness researchers, people in “Adidam,” New Agers, and so on. And, I will be proving that this is not a matter of semantics; I am talking about exactly the states people are referring to when they use the words “Consciousness” and “Light,” which they wrongly deify. Notice how the word itself tells us that, “Consciousness is a CON right from the beginning.” Then see that, phonetically, the word “Light” shows the state to be “‘a lie,’ right from the beginning.” I will absolutely prove the significance of such word analysis, specifically in English. It is only because you have not had the correct physical picture of Reality, and the cosmos, that you think, for even a moment, that you should in any way be “giving yourself to Consciousness.”

### **Consciousness is the Inverse State, the Mirror; “the Self,” in Love with Itself**

Let me say more about the mirror effect within that first cosmic essence medium. What happens when you look in a mirror? Do you actually see yourself as you really appear to others? The answer is that you do not. A mirror inverts your image so that left and right are reversed, creating a false state to your observation. Consciousness is a state of inversion, and is to be directly compared to this mirror effect; Consciousness is the exact mathematical opposite of the Awareness state of the Heavenly Reality and Supreme Being.

And this next point is crucial: Consciousness links directly to the all-important Greek myth of Narcissus. As you know, in that story, a young man “has it all,” but goes off to seek even more. He ends up sitting at a pond staring at his own reflection, which he falls in love with. He stays there transfixed, and dies that way. This is the quality of the Cosmic Consciousness; totally self-involved and deluded, in a state of rapturous self-love, totally divorced from relationship with the actual Supreme Being and Heavenly Reality. Temporarily creating this is necessary for the process of Perfecting Existence. Jones uses the myth of Narcissus in his teaching, but explains the meaning of the story incorrectly, acting as a cosmic disinformation agent “in the literature.” The real meaning of the story is about the Cosmic Consciousness. Jones claims to have “transcended Narcissus,” but in fact the exact opposite is true: he is actually the ultimate Cosmic Narcissus. Here he practices the principle that “the best lie is always one step from the truth.” Here is an excellent summary of Narcissus that was written by the author Suza Scalora (read it with Jones in mind):

One glance and he was lost. He had made the great discovery: His passion, his god, his one true love—and it was his own image. I am perfection, he thought. The world begins and ends with me. All the others in this world are phantoms, fleeting and devoid of meaning. They count for little, yet I endure. . . . [F]rom that day Narcissus first saw his reflection, he began to see everything as it related to his own image. ([http://myth.com/mythopoeia/narcissus\\_truth.html](http://myth.com/mythopoeia/narcissus_truth.html).)

A key facet of this is that, if approached by the Truth, Consciousness/Narcissus has an automatic recoil and runs away. Some may even feel this impulse quite strongly as they read this document. It could appear as an emotional recoil, and/or the mental state of doubt, or “certainty of disagreement.” Hopefully, however, the feeling will be one of liberation and freedom from the burdens, obligations, ordeal, and financial drain Jones is on your life (or Cohen, etc.). Cut yourself loose now and get out! You must clear your head, your emotions, your body, and your heart.

### **The Purposes of Existence and Creation**

Your question at this point is probably, “Why would the Supreme Being create all of this?,” and the answer is found to be clear and precise. We must ask ourselves, “How did that state of Perfection for the Infinite Being originate?” The true nature of the quality “Perfection” would have to be discerned, seemingly first.

It turns out that existence began as an infinite blankness, without qualities of any kind. The great change of state that then occurred was to instantly transition to Infinite Perfection, but such that a process that proved what that is, and why, had to unfold in fine detail through what ultimately becomes the cosmos in its interaction with the Supreme Being. The Perfection was instantaneous, but a discrete pattern of paying for it, and proving what those exact qualities are (and why), has to unfold in real time in a real cosmos “down below,” at the center of it all. They arise simultaneously. This occurs because, by being Infinite, Existence cannot have any quality or qualities that are less than absolute, which would constitute imperfection; therefore, only Perfection can manifest, with imperfection appearing (temporarily) “down below.” We are living in that

inverted cosmos right now. Every person who suffers and endures this place is helping to “pick up the tab” for this Perfection event.

This finite and largely negative cosmos will soon be ended, and the final state of Existence will occur, which is Infinite Perfection that contains within itself a New and Eternal Creation, a new universe without any suffering, populated by great human beings who only live the Perfect Truth (in fabulous life motifs). The human form was designed to be the ideal physical and aesthetic form for the Eternal Existence. (Please note that I will need to explain the many details about this as time goes on. This is just a summary.)

### **The Cosmic Levels, and Why Consciousness Dominates in Human Life on the Earth**

Think back to how we described the cosmic Consciousness medium being created in the first place. We started with the essence medium of the very Supreme Being, and part of that was then set aside and bounded within a sphere, where the quality of this interior medium flips to the state “-1.” The quality of this is that -1 now thinks he is the Absolute, while the Supreme Being is only inherent “downstairs,” and essentially invisible:

**Consciousness = -1**

---

#### **The Supreme Being**

This has been overlaid upon the life of our solar system, as part of the laws of life. This is a regrettable requirement in order to pay for, and directly create, the Perfection of Existence. Our solar system is best pictured, metaphorically, as a duplex, in which the Supreme Being’s local form (the energy medium for our universe, whole number one, 1, described below, which is also part of you), is forced to live in the basement of your life, while -1 gets the top floor (and thus the power to more largely determine your personality, thoughts, and actions, and this ultimately leads to worldly power being in the hands of the most clever, and well-camouflaged, but actually negative and inverted people, which is right where we are today, especially with Franklin Jones, and of course Andrew Cohen). We have to flesh this out completely because there is much more to it.

The cosmos has levels, created from the repeated centering of the original cosmic/spherical boundary state. It has five primary cosmic levels above our own [picture the layers of an onion (in fact, the existence of the onion in our world is such that it actually shows meaningful duplication with the cosmic state, specifically because ‘an onion makes you cry,’ just as the cosmos does)]. These levels have been completely mapped by the Hindu and Buddhist realizers of India and Tibet (and by Jones, who completed the list of cosmic states to be ‘realized’ in 1970). Here are the eight levels of the cosmos, beneath the Heavenly Being and the Supreme Being (observe that the total is 10, and note the appearance of *gross matter* and *gross light* as the final level of the gross universe):

**HEAVENLY BEING  
SUPREME BEING**

---

***Supracausal* Essence Medium**

---

***Causal* Essence Medium  
*Causal* Void State**

---

***Subtle* Essence Medium  
*Subtle* Void State**

---

***Gross* Essence Medium, “Energy”  
*Gross* Void State, “Outer Space”  
*Gross* Physical Matter and Light**

As it turns out, the mathematical system requires that there be exactly four main levels in the cosmos, and as you can see, there are four primary “essence” level names shown above. Moving from the top downward they are the *supracausal* (uniquely realized by Jones), the *causal* (realized by such people as Ramakrishna and Ramana Maharshi), the *subtle* level (realized by lesser yogis), and finally the lowest level, the *gross*, which is our universe (you might ask yourself, “Where is the *gross* level realizer?”). Every metaphysical teaching of ‘the great Hindu realizers’ is found to be false, because the higher cosmic levels (*subtle*, *causal*, and *supracausal*) are all -1 forms of the inverted Consciousness. We became deluded by what these people claimed. Jones is the pinnacle of that false pyramid [this is why his original logo looked like the top of a pyramid with the capstone separated (presumably “descending”), as is shown on the inverse side of the American one dollar bill; note also that this symbol shows a trapezoid (you are in that trap, his cult), a “symbol” the actual Supreme Being would never use]. His new logo now has top and base connected, but the symbolism is still the same.

Hindu realizers meditate on the cosmic *essence medium* states (*full*), while the Buddhist’s meditate on the cosmic *void* states (*empty*); all are classified as negative (in the existential and aesthetic sense as viewed by Lord Shiva). Here is how the number basis is displayed:

**HEAVENLY BEING = ∞  
SUPREME BEING = 1**

---

***Supracausal* Essence Medium = -1**

---

***Causal* Essence Medium = -1  
*Causal* Void State = 0**

---

***Subtle* Essence Medium = -1  
*Subtle* Void State = 0**

---

***Gross* Essence Medium (Energy) = 1  
*Gross* Void State, “Outer Space” = 0  
*Gross* Physical Matter and Light = 1**

(A note: don't let "math phobia" kick in here and fog your attention; you will understand all of this if you just follow the explanation.) There are four numbers at the basis of all creation, organized in a dual hierarchy, like this:

$$\begin{array}{r} \mathbf{1} \quad +\mathbf{1} \\ \hline \mathbf{0} \quad -\mathbf{1} \end{array}$$

The first column shows the opposite state numbers for the whole numbers (think of a computer, which has switches that employ **1** for "on" and **0** for "off"). The second column shows the opposite state numbers for the integers (the two directions on a number line, **-1** and **+1**; as an example think of the temperature scale). Notice, in the top row, the difference between whole number one (no signs, **1**), and positive one, **+1**. This key distinction is not being made in mathematics or physics, but is in fact fundamental to the correct mathematical system. The Supreme Being is the Whole Number One state (check your intuition and common sense).

Even though this simple diagram is at the basis of physics and life, it is unknown in mathematics or science. You will never see it in any book. Mathematicians missed the true basis of the subject.

True realization does involve simple mathematical understanding, something Jones is utterly ignorant of; his idea of mathematics is making such ridiculous statements as "elephant to the spoonful" (he actually said this).

Now look at the larger chart above and note that the *gross* essence medium (for our universe) is uniquely whole number one; this becomes a local form of the very being of the Supreme Being. This essence medium is what we call "Energy," and this is also "Providence" for the Gross Universe (the universe is what you see when you look out at the night sky; the Energy medium is the level above that). All physical matter and light (with space as the backdrop) is made from whole number one Energy, and is therefore a form of the Supreme Being. The problem occurs when **Life** (phonetically, "'a lie' right from the beginning;" and "a lie that gets an 'F'") brings **-1** Consciousness into conflict with **1** Awareness; they get placed into a kind of "shotgun wedding" within the body and mind of the human person, through a specific mechanism I will describe. The Earth is the unique planet in the whole universe that is playing out the details of this great matter of the Perfection of Existence. There is life everywhere in this universe, but the Earth is special and unique.

It is probably a shock to you to hear the Eastern realization forms being described as false and negative states, and yet this is absolutely true. You must disidentify with them immediately, as they are harming you. We can see this factual and aesthetic meltdown in the details of what these "masters" teach. Ramakrishna was known for his crazy and bizarre behavior, and is at the basis of the Jones "vehicle." Swami Muktananda was a pedophile (did you know that?! Jones says that he teaches "Crazy-Wisdom," that he is a "mad avadhoot" (a person free of cultural or societal standards), and indeed his actions *are* evil (his many outrages cannot just be "explained away"), and cultic.

Notice that these Hindu meditators have to invert their attention to exploit the esoteric anatomy of the body-mind, in order to get to these other states of the cosmos and anchor them into themselves and this world (a bad thing; *never* a good thing). Ramana Maharshi would just sit there in a stuporous state of “bliss” (after being forcibly taken over by the causal level, in just 20 minutes, a story you can read) and he was hailed as a “great master.” But he was only a deluding form who took everyone away from the actual truth, which has nothing to do with such useless, inverted meditation on “bliss.” *That bliss can be compared to the extreme pleasure people say they feel on heroin.* It is a false, deluding state, the self-love (and deluded “happiness”) of the cosmic Narcissus, the essence of the feeling of the *supracausal/causal* levels. *That* is what Consciousness/bliss is. A fraud! That is who Franklin Jones is; incarnate, in a complete –1 *supracausal/maya*-‘master’ takeover (completed in his so-called ‘divine emergence’ event of January 11, 1986, but which was really the *supracausal* emergence disaster).

No person needs to attain these “samadhis,” or supposed “states of enlightenment,” in order to “escape the wheel of samsara,” etc.; claiming that to be true is all an illusion, a lie, a deception. This is a delusion perpetrated from behind the scenes by *maya* (the correct Hindu term that refers to the illusion, delusion, and ignorance automatically generated at the very basis of this world and cosmos). We have been sold a bill of goods.

This underlying Consciousness is also how illusions get created that seem to “prove” or “indicate” that people survive as ongoing persons after death, whereby they “go to live forever ‘in’ Heaven,” “go to school ‘on some other plane,’” become ghosts in the world, appear as souls who can speak through mediums, etc. There is a powerful deluding force in the cosmos that can be directly identified as the “Kundalini-Shakti” power (there are people who will read this that will think this characterization of “the Kundalini” cannot be correct, but I will prove it; Reiki is a prime target in regard to this). It works to generate these kinds of false illusions (even healing, but what you didn’t know is that, because of the hidden mathematics of that, two people just slipped on a banana peel to pay for it). This Shakti (better read as “shock-ti”) also seeks to move people to these “realizations” of the higher cosmic levels. Think of the Wizard of Oz, where there is a hidden person behind a screen who manipulates viewers in the front with illusions that are not actually true. It is significant that Franklin Jones was born in the same year that the Wizard of Oz premiered.

But let’s flesh this out even more, so that you can see the real details of how all of this works. Some of it will be familiar since Jones does describe the basic structures correctly (except for not identifying “Amrita Nadi” with the –1 *supracausal* state of the cosmos, which of course is the all-important thing.)

The human person has a body and mind that normally experiences only two main states, which are the waking state and the dream state. This is the first thing that proves the existence of the *subtle* level of the cosmos, just one step above our own *gross* level universe. The top two cosmic levels, *supracausal* and *causal*, arise together as a paired state (thus the word connection they share), but the *subtle* and *gross* levels also appear as a twin state. This is why the human being has an enforced law of time (the Circadian

biological rhythm, our daily cycle of waking and sleeping) that forces the attention of the person to alternate between the gross waking state (ordinary daily life) and the subtle dream state. In our daily gross experience things are real and tangible. But this also seems to be true in the subtle dream state, and while you are there you cannot tell otherwise (lucid dreaming that may see through this is possible, but is more rare). This provides proof that there is some kind of coupled gross/subtle pattern in the larger cosmos.

There is an esoteric anatomy of the body/mind. It works from two main axes, which are horizontal and vertical. The horizontal axis exists across the chest and has three main stations. These stations are *gross* to the left, *subtle* in the center, and *causal* to the right. Our normal waking experience operates through the gross station. But yogis exploit the option to seat attention in the *subtle* or the *causal* stations, and this allows the movement of attention to the higher cosmic levels and states. Jones does summarize this, as you know.

The vertical axis goes up the spine. The inverse,  $-1$ , Kundalini-Shakti power is activated from the base of the spine (near the rectum, which is significant), to then travel upward in the *ascending* direction (seeking to rejoin the  $-1$  cosmic levels). Suppose we have a yogi experiencing the subtle level of the cosmos. His inverted attention shuts out the *gross* station and attention reseats into the *subtle* station. At the same time the Kundalini-Shakti force causes an *ascending* motion of his attention that moves him up the spinal line, and thereby up to the subtle level of the cosmos. What is really happening is that the person is being taken over by an induction force stepping down from the higher cosmic levels. The tentacles of the *supracausal/causal/subtle* octopus are always seeking to take people over by this type of mind control [Hindus and Buddhists to start, but now anybody could be vulnerable, as you were when you were sucked into his cult (or Cohen's cult, etc.)]

Now examine moving attention to the *causal* station. Let's use Ramakrishna as the example. He is seated in meditation, and there is a motion to the causal station across the chest (which over time became stable so it is permanent), combined with an absolute ascending motion through the "crown chakra," and the result is his splashing into the *causal* level of the cosmos, in the state called Nirvikalpa Samadhi, or "formless ecstasy" (a total misnomer; this is actually the false delusion state of the "bliss" felt by the cosmic Narcissus in his own self-love, as he is lost in the cosmic mirror). Ramakrishna was so addicted to this "high" that he would not return to the body for weeks at a time, and people would have to feed and care for the body to keep it alive. Such a thing is a freak show. Overturn this cosmic "adepts" regime! The Supreme Being is revolted by such things, and we should be too. But instead, people like this are hailed as "the great masters." How accurate can our sense of reality be, given that we were conned by this, for all this time?

Hearing this explanation will obviously come as a shock to your system. But people have to really get this point about Consciousness being  $-1$ , and not the object of attention or devotion. This true message has never broken through *maya* before.

Prior to 1970, no person had ever realized the *supracausal* level of the cosmos. It was always believed in Hinduism (and still is) that there are only three cosmic levels, *gross*, *subtle*, and *causal*, and that what is found outside or beyond that is *turiya*, “the fourth state” (usually called “Brahman,” but actually discovered to be the bounded *supracausal* state). The final state of cosmic “realization” (at the *supracausal* level) occurred for the first time in the life of the Franklin Jones in 1970, although he believes it to be the absolute state, what he calls “God-realization.” As he himself describes it, what makes this realization state possible is a special esoteric “nerve channel” called “Amrita Nadi.” What this does is link the *causal* heart station of the horizontal axis of the chest with the “crown chakra” in the ascending spinal line. As he says, it is shaped like a crooked “S,” emerging from the *causal* station, moving up and through the throat, and then curving behind the top of the head to link to the top of the ascending line. But this is the –1 *supracausal* realization, involving the maximum exploitation of the pathways of inversion!

This overall explanation also shows why being “spiritual” is not “the answer to life.” Notice that the word “spirits” is used for alcohol, and alcohol is a poison. [I will be showing that such word significances have been set in the English language by Lord Shiva to perfectly display the true significance and meaning of things (*Mathestry*, which we will get to later)]. The more drunk a person gets “on alcohol/spirits,” the more Consciousness pours forth. (That Jones would drink, or ever allow alcohol for his “realizing devotees” is instant proof that he is a false teacher, as viewed by the Supreme Being; I, for example, never drink alcohol, and never have.) The Kundalini-Shakti is described as a “spirit-power.” Jones describes it with exactly that language. And, he now generates an even higher (and therefore worse) “spirit-power” which he calls the “Hridaya-Shakti,” based in the *supracausal*, and his “spiritual transmission” is helping to destroy the world. Whatever involves the idea of “spirit,” or “spiritual experience,” is deluding (his 1974 “Garbage and the Goddess” talk should have included his own activities as well, with the correct message to *get rid of all of it!*). This exposé includes the near-death experience, which we will get to later here. The correct attitude is to be religious, but not involved in any of the current “religions.”

Remember that the headline is:

### **Consciousness is a CON, right from the beginning.**

As seen in the diagrams on page 12, there are also secondary causal and subtle levels that are voids (*causal void* and *subtle void*), and these have been realized or meditated on by the Buddhist adepts (*causal void* in India, *subtle void* in Tibet). The void states are *emptiness*, and thus are mathematically **0** (compare to space, which is also a 0 state; “outer space” is the gross level version of the void state). Every esoteric teaching of the Buddhist realizers is also false. Buddhism begins with the teaching that “desire is the cause of suffering.” False. Suffering is caused by the very nature of the whole cosmos, and unfulfilled desire is just one component of that [the implication in these Eastern systems is that everything is primarily *your* fault (for Jones this is, ‘You are always performing the self-contraction,’ a lie)]. A final ‘emptying yourself of desire’ is not some

kind of ‘solution.’ No person should ever meditate on “emptiness.” Check your common sense. Should we really say that Heaven is a state of *emptiness*? No way. Heaven is an Infinite Fullness of Great and Perfect Being. People have rationalized this by saying that “nothing” means “no-thing,” and this is presumably ‘the state which transcends separation.’ That is, however, a merely mental concept that does not correspond with the actual reality. “Nothing” means 0, and the Infinite Being cannot “equal 0,” as it would not exist. That reality is *precisely not 0!*

You should know that the last thing the Supreme Being wants people to be doing is meditating in an attempt to “realize existential truth,” or “go into samadhi,” or “go out of the body,” or “go into the other cosmic levels.” Aside from simple calming or relaxation (or perhaps to clear the decks in order to access intuitional Awareness), meditation is an act of inversion. When someone is meditating for long periods in their own mind they are not in relationship with others, or serving the needs of people around them, etc. *That* is what the Supreme Being wants people to do: practice good, wholesome, authentic relationships, and do good in the world. He needs you engaged, improving the world, not abstracted and disengaged in a cave or “meditation hall” somewhere. Only Narcissus enjoys (even desperately seeks) that kind of thing. Aren’t you in fact relieved that you will never have to do this again, the burden of trying to climb that fictional mountain?

By choosing the name “Mountain of Attention” for the California site, Jones is saying that “attention” is what this “guru” is all about (actually, *mayaguru*, where “guru” is pronounced Indian style, “meye-uh-guh-rue”). But in his own teaching, he claims to be the realizer who has “transcended attention.” But by using this name he rather tells us that he is a MOUNTAIN of attention; this is because of the enormous size of his narcissistic personality. Such contradictions must be recognized, and seen as both literal and meaningful. In my work I show that there is a single, living pattern in world events governed with Intention by Lord Shiva (a pattern that was previously unrecognized, but which is now recognizable to anyone because of the simplicity). Everything is linked by significance and meaning; especially the words we use, and the names we choose.

Everyone has been deluded through all of human history about the true nature of the *actual* Supreme Being and Heavenly Reality. Even so, for the Earth, everyone is rewarded with Heaven after death. The first thing the Supreme and Heavenly realities would wish to do right now is to sit you down, take you by the hands, and apologize for whatever suffering you have had to endure. There is no “judgment,” or threat of “punishment.” All receive the “Great Reward.” Nothing else would be fair given that the deck is stacked against us.

### **Taking a Breath, and then Looking at *Mathestry***

That is a lot of material, and so let’s take a break from the heavy explanation. I want to talk to you as a person. If you are involved with Franklin Jones or Andrew Cohen, or any similar groups, consider the presentation here to be an act requested by Lord Shiva Himself, sent directly to you. In the cases of Jones and Cohen, this is in order to bring down their cults, and to liberate the people they have enslaved, including you. A key line of guilt Jones may try to bring up in your mind will be your “eternal vow.” But I ask you,

how can you make an “eternal vow” with a finite, noneternal being? Any such ‘vow’ is nonexistent, no matter what you signed.

Here is what happens in this world: Because of the inversion, Consciousness is senior and now dominates everything, lording over the actual Supreme Being:

### **Consciousness (Jones)**

---

#### **Actual Supreme Being**

This is directly affecting my life. You should know that I am an historical figure described many times by Nostradamus [he even describes the archetypal conflict between me and Jones (who he calls “the sordid one”)]. My life and Jones’ life are in an opposite states symmetry, with him at  $-1$  and me at whole number one,  $1$ . An example of a “blip” of this fact is that some years ago (mid-1990s) Jones named a Macaw, “Provo,” but then suddenly changed it. This showed him “giving me the bird.” He has been working against me directly, and I have suffered mightily for it. This must be ended immediately.

What this backwards state of things has meant is that while he is falsely elevated on pillows and worshipped, etc., with fancy infrastructure (when he should have been run out of town on a rail), I have lived largely alone in total poverty for over 13 years (and, without real help from people like you, I will not even survive). Jones is directly responsible for this crisis in my life; it is a metaphysical attack that probably includes activity in the “Sukra Kendra.” Lord Shiva wants to know which of the people who are currently in Jones’ group will come over to our side instead, and support this work. But there will be no cult of any kind. I am the cult destroyer. The same question is being asked of all who are in Cohen’s group, or who are involved in Consciousness studies or metaphysics in general.

Aside: Here is the one thing you and I share in common, in a major way: We want to live a Hindu ashram dharma (I have never been able to do this, however). You may feel that if you leave the cult, you will lose that, and, because this is so important to you, this possible ‘weakness’ can be exploited to hold you in place. There must be a new and universal “ashram dharma for the modern world,” and I will be providing that. You could help to pioneer it. That part of your life can be recovered and redirected to the real Guru, who is Lord Shiva. As just one example, there is a desperate need for great new chanting.

The rapid decay we are seeing in the state of the world is amplified by Consciousness generally, and through your devotion to Jones; what you are doing is actually giving him the power he needs to destroy the world. (This is true for people like Andrew Cohen as well, as he adds to this false energy being sent into the world.) You must see this clearly and get out, all of you, everybody together, all at once. Go into sudden mutiny; force the assets to be sold with the proceeds distributed to all people involved with the group, and start new lives. Just end it, all together, right now. Burn his objects, photographs, books, and everything else. An extreme view? Not in any way.

Now, to explain more about all of this, I need to tell you about another one of my scientific discoveries. This is the discovery that there is an unknown law of time active in human life, created by Lord Shiva relative to the English language, called *Mathestry*, which determines the timing of major world events (and the significances among people and events) through simple arithmetic calculations anyone can understand. This provides a means of objective proof for what I am saying, external to myself. One of the secrets is that Nostradamus was shown *Mathestry* and used it to encode parts of his quatrains. I must present this calculation method next because I need it in order to show you things about Jones; especially the fact that he has an overdue ending right now, January 2007. Read the text I will show you next, and then we will come back to that.

This *Mathestry* law determines the details of the flow of history and the occurrence of major world events. It shows that there is a mathematical basis which produces calculations that determine potential world events, some of which become actual according to the purposeful needs of history (right now people assume that things just happen ‘randomly; or haphazardly, and this error of assumptions must be corrected).

The *Mathestry* law is value neutral, and works the same for all events, good or bad. Its purpose is to determine the meaningful world events that shape history and determine its course. It becomes especially present and obvious at the 2000 node of the 1600-year cycle, our current times, but works throughout all history in regard to the major world events. For example, we can calculate the date of Julius Caesar’s assassination, the date that Napoleon Bonaparte became First Consul of France, the date on which the Hindenburg went down, and even the date of the May 18, 1980 eruption of Mount St. Helens.

A primary purpose of the *Mathestry* law is to show, in our time, when we very much need this knowledge, that events do not occur merely ‘randomly,’ but are ordered according to higher reasons than may be evident on the surface. For example, consider as an example the following news story. On January 30, 2005 a British C-130 Hercules plane crashed in Iraq and became a major news story. As the observer, look more closely at the name:

### **C-130 Hercules**

Notice that the date of the plane becoming a major news story is shown right in the name; “130” becomes 1/30, or January 30, placing it in the news on that date. If this were just one example, it could (and should) be dismissed as a “mere coincidence,” but it is not. This kind of thing happens in every major world event (although mostly through the calculations we will see in a moment). You need only attain this understanding and turn on the television news coverage of a major world event in order to see the results right before your eyes.

### **The Random Number Experiment**

A very important and revealing scientific experiment has been carried out for over a decade by scientists from Princeton University and elsewhere. These scientists placed more than 50 random number-generating computers at various locations around the Earth. These computers produce strings of random numbers that are then evaluated by several statistical analysis programs. Normally, these devices just produce random numbers. To the scientists own surprise, however, *these number sequences inexplicably and suddenly shift from randomness to 'order' during the occurrence of major world events*. Such an effect is completely unexpected. The events of September 11th, for example, produced some of the most significant results for all the data recorded so far. This experiment shows that there is some kind of “ordering force” behind the occurrence of world events. But what could this force be, and how would it work? I have discovered the answer to this question. These effects are caused by the *Mathestry* law, whose purpose is to force certain world events to occur (and thereby force these computers to change their output, so that we see this effect and seek to understand how this can be happening).

### **The Three Calculations of *Mathestry***

There are three types of *Mathestry* calculations that each give numerical values to words in English. This works because the modern Western/English alphabet corresponds exactly to the language already established for this law of time. English is now the world language because the laws of this solar system use exactly that language, according to their intelligent and Providential design. This is for us to understand, uniquely in our time, because it surprises us, and proves the fact of a “larger reality.”

In a moment we will see exactly how the calculations work, but for two pages only we will call these calculations:

**Calculation 1**

**Calculation 2**

**Calculation 3**

We have just witnessed the major news story of Hurricane Katrina. Let’s examine the main name according to the first calculation:

$$\mathbf{KATRINA_1 = 29}$$

The bigger the news story the more exactly and profoundly such calculations must correspond with what actually happens, and with what we see when we watch the news (observation). This shows that Katrina should display its archetypal significance relative to the number 29, and this is exactly what happened. Hurricane Katrina made landfall on the Gulf Coast during the morning hours of August 29.

Did something similar occur for the South Asian tsunamis disaster? Let’s check:

## TSUNAMIS<sub>1</sub> = 26

Given the enormous nature of this story we expect exact alignment, and find it. The multiple tsunamis event occurred on December 26, in 2004.

This begins to show how *Mathestry* uses categories, and assembles news stories so that those categories are displayed in the news on the archetypal “schedules.” And, these two examples show that this is even true for natural phenomena, something we hardly expect to be possible. This proves the existence of a deep creative principle in the appearance of the universe and life, knowledge we need to attain. Even bad events have larger purpose.

Aside: They say that a little knowledge can be dangerous, and there is some truth to that here. Please understand that this is a short summary introduction of a massive body of material covering thousands of proof-texts and stories. It would be impossible to present a whole course on this here, but what I am explaining works every time (and of course there is far more to it). [Also, the idea that, ‘if you do enough calculations you are bound to find things that match,’ etc., does not apply here as that is not what this is.]

Let’s see yet another example of a natural event displaying the *Mathestry* law, in this case using the second calculation:

## MOUNT ST. HELENS<sub>2</sub> = 185

Here we see the date of the great eruption of Mount St. Helens on May 18, in 1980. We write this as follows:

## MOUNT ST. HELENS<sub>2</sub> = 185 = 18/5 or May 18

We see again that a natural phenomenon occurs in exact correspondence with a *Mathestry* calculation, creating a major news event with great significance. We must comprehend how everything started at the Big Bang such that this geophysical activity of the Earth aligns, on that date, with this calculation exactly. In other words, what we see is that there is vast Providential design present. And the main point is that you get to read this, which is also part of that Plan of Lord Shiva.

We now turn to human events and begin by examining two simple examples. First recall the burning to the ground of the Windsor Building in Madrid, Spain in early 2005. Write the name according to the second calculation:

## THE WINDSOR BUILDING<sub>2</sub> = 213

The calculation produces a date, 2/13, or February 13, and this was the date when the Windsor Building burned to the ground, going up like a very tall Roman candle. It burned due to an undetected electrical problem associated with renovations on the 21st-floor. As it turns out, this symbolizes the way Western Civilization could quickly “go up in

flames” in the 21st-century, falling just as Rome did, and from an undetected problem. (That problem being that we did not know about these laws, and how to respond to them.)

Now examine a calculation three example:

$$\text{COLUMBIA}_3 = 107$$

As we know, the *Columbia* space shuttle burned up on re-entry on February 1, 2003. And when we check, we discover that this was during NASA shuttle mission number 107. It can be said that the crew gave their lives so that we would have this proof for *Mathestry*. Without examples such as this we cannot discover the *Mathestry* law.

### Examining “the Ending”

Now take the position of the observer and read the statements of the last three examples:

$$\begin{aligned} \text{MOUNT ST. HELENS}_2 &= 185 \\ \text{THE WINDSOR BUILDING}_2 &= 213 \\ \text{COLUMBIA}_3 &= 107 \end{aligned}$$

We view the number that comes at the end of the observation as being “the ending.” In other words, as the observer reads left-to-right, the number comes at the end of the formal act of observation. The number is therefore “the ending.” This is the easiest pathway to establish the date or other details of a major world event; one that is about “ending” in some way. We can say:

**Mount St. Helens has a “185 Ending,” on May 18th.**

**The Windsor Building has a “213 Ending,” on February 13.**

***Columbia* has a “107 Ending,” during Mission 107.**

This “ending” pattern repeats over and over in major world events (I have recorded thousands). It is, in fact, the most likely way that the *Mathestry* law will determine the essence of the event.

### **The Three Calculations Come from Two Alphabet Charts, and the Act of Addition**

The entire world uses the “Base-10” number system [based on powers of ten; for example  $350 = 3(10^2) + 5(10^1) = 3(100) + 5(10)$ ]. It is usually assumed that this choice is just “arbitrary,” and that any base value could be chosen. This turns out to be untrue, however. The fact is that nature uses Base-10 for all laws, for both physics and life, because 10 has unique properties. To have Base-10 we need the ten digits we all know:

**0 1 2 3 4 5 6 7 8 9**

It then also turns out that a basic structural state emerges as the *Mathestry* law is constructed, such that there are exactly 26 individual states in a special group. These become the letters of the modern, Western/English alphabet:

**A B C D E F G H I J K L M N O P Q R S T U V W X Y Z**

Just as DNA works from only four basis elements (the molecules adenine, guanine, cytosine, and thymine), the *Mathestry* law works from the two basis sets shown above, uniting numbers and letters. This uniting occurs in two primary ways, as follows.

The first way creates the following chart:

***Mathestry Alphabet Chart in MOD9***

---

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>
<hr/>								
<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>	<b>E</b>	<b>F</b>	<b>G</b>	<b>H</b>	<b>I</b>
<b>J</b>	<b>K</b>	<b>L</b>	<b>M</b>	<b>N</b>	<b>O</b>	<b>P</b>	<b>Q</b>	<b>R</b>
<b>S</b>	<b>T</b>	<b>U</b>	<b>V</b>	<b>W</b>	<b>X</b>	<b>Y</b>	<b>Z</b>	<b>0</b>

Notice the perfect symmetry of this arrangement, as viewed by the observer. Each letter of the alphabet is paired with a primary numerical value. “Calculation 1” occurs when the numerical value of a word is determined by this MOD9 chart. For example:

**LETTER,  
3 5 2 2 5 9  
26**

Here, we even see that the total for the LETTER archetype is 26, *giving the exact number of letters in the system* (this kind of internal consistency is always present, and what we see is constantly a marvel). The digit 0 appears in the 9-column, but in the letter section. This shows that 0 is necessary among the letters to act as the space between words. The term “MOD9” refers to a deeper mathematical basis present in the chart, which is circular or “modular” (think of a kitchen clock, which is “MOD12”). Our thoughts, and human life events, are directly linked to this chart. This is in the news patterns all the time.

The second way to pair numbers and letters is for the observer to count the letters of the alphabet, as follows:

## *Mathestry Alphabet Chart in MOD26*

---

**1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26**

---

**A B C D E F G H I J K L M N O P Q R S T U V W X Y Z**

“Calculation 2” occurs when the numerical value of a word is determined by the MOD26 chart.

“Calculation 3” occurs when the MOD9 and MOD26 values are added to give “the Unity Value” for the word.

A note: *Mathestry* actually originates in the mathematical property of *modular congruence* as described in number theory, and in my own mathematical work.

Let’s see just a few quick examples from among the many thousands I have recorded over the past 12 years (a process that required my constant monitoring of the news):

**ELIZABETH ANN SMART<sub>9</sub> = 71 = “71 Ending”**

Utah teenager Elizabeth Smart, in an abduction story that made national headlines, was suddenly recovered from her nearly nine-month kidnapping ordeal in 2003, on March 12, *the 71st day of the year*.

**THE ALFRED P. MURRAH FEDERAL OFFICE BUILDING<sub>9</sub> = 194**

The Murrah building had a “194 Ending” on 19/4, or April 19th, in 1995, when it was bombed.

**ROBERT KENNEDY<sub>9</sub> = 66**

Robert Kennedy had a “66 Ending” on June 6 (in 1968) when he died at 1:44 a.m. that day after having been shot the day before at the Ambassador Hotel in Los Angeles (notice how he had to linger until the next day to make this alignment occur).

Okay, now here is a big one:

**HAMBALI<sub>9</sub>  
8 1 4 BALI**

The terrorist Hambali was arrested on August 11 in 2003 for the massive car bombing in Bali, Indonesia that killed 202 people on October 17, 2002. News of the arrest broke worldwide on August 14, and notice how his name produces the sudden appearance in

the news on 8/14, in regard to Bali. When a story is in the news, we can observe it, and *Mathetry* establishes those dates, for that purpose.

**PAUL M. JOHNSON, JR.<sub>26</sub> = 186**

In this case we see the contractor who worked for Lockheed Martin that was kidnapped in Iraq and beheaded by Al Qaida terrorists. This is how his name appears on his Lockheed Martin business card, showing that he has the potential for a “186 Ending,” and this occurred when he was beheaded on June 18, in 2004.

The next examples illustrate the Unity Value, our third calculation.

**COLUMBIA<sub>9</sub> = 31**

and

**COLUMBIA<sub>26</sub> = 76**

combine to give

**COLUMBIA<sub>U</sub> = 107**

This shows how we obtain the unity value of 107 for *Columbia*, and see its potential for a “107 Ending,” which occurred when the shuttle burned up at the end of NASA shuttle mission 107, on February 1, 2003.

Now, for this presentation, here is the grand finale. The second Gulf War started exactly according to the *Mathetry* calculation found in the unity value of the name itself:

**GULF WAR TWO<sub>9</sub> = 47**

and

**GULF WAR TWO<sub>26</sub> = 146**

combine to give

**GULF WAR TWO<sub>U</sub> = 193**

Next, instead of writing the unity value total at the end, write it like this:

**193 = GULF WAR TWO<sub>U</sub>**

In this case we see that **GULF WAR TWO** has a “**193 Beginning**.” And this is exactly what happened when the war started on **19/3**, or **March 19**, in 2003.

But there is more. Next write these three numbers on a circular clock-type form:

3

9 1

Now notice that we can start rotation around this sequence from three different starting points, at the 1, at the 9, and at the 3. Doing so gives three different sequences:

193

931

319

These manifested in the actual event as follows:

**The Unity Value for “Gulf War Two” = 193**

**The Starting Time for the War = 9:31 p.m. (Eastern Time)**

**The Date of the War’s Beginning = 3/19, or March 19**

The start time of 9:31 p.m. was officially announced by the Pentagon that same evening. Bush activated this *Mathesry* potential, inappropriately, and in major personal error, and the result is the current catastrophic situation in Iraq.

Here is a larger fact about this that adds further proof that the law, and calculations, *were* responsible for that exact start time, to the minute. You probably have not heard this information. Did you know that the originally planned date for starting the war was March 21, but that an unusual sequence of events occurred that forced the date and timing to be reset? Here is what happened. Due to the extreme strength of Saddam Hussein’s regime, the CIA did not have a single operative in Iraq prior to the war. When the war was looming, the CIA secretly landed agents in Northern Iraq, established a base house, and set about recruiting members of his regime, providing large cash payments, satellite phones, and so forth (“Operation Rock Star”), so that they could spy for us. As March 19 arrived, however, there was a sudden development. One of the Iraqi CIA operatives (or was he a plant to get into the CIA’s operation and disinform it?) urgently reported to his CIA handlers that Hussein was now staying at the Dora Farm, near the Tigris River, where there was an underground bunker. After flowing rapidly up the chain of command this information arrived directly in the oval office. A meeting between the president, vice-president, CIA director and others then occurred, in which they examined the information. Bush then asked everyone to leave and sat alone with Cheney. He asked what Cheney thought they should do. Cheney advised ordering a strike (even though this would throw off the whole invasion plan worked out by the Pentagon). Bush decided to do this, and what ultimately transpired was the war starting on March 19, at exactly 9:31 p.m. Eastern Time (this exact minute was stated by the Pentagon and reported in the media). The strike was a total failure, as Hussein was never there, and there was no bunker. (All of this is described in the recent History Channel program, *Beyond Top Secret*.) This means the CIA was apparently given disinformation (Hussein’s regime was highly capable in such matters). Thus, the whole war event is associated at its very

beginning with the sign of *deception*, and, if you will allow the term, delusion (not “just making a mistake”). In other words, the American government was deluded right from the beginning about what they were doing, and the proof for this is now obvious. Our military power and soldiers are awesome, but the political leadership was in serious error (Bush, Cheney, et. al. are major –1 Consciousness forms).

We see in this example that *Mathestry* forced certain events to occur in order to make the event start exactly according to the calculations (this a force of *induction*, and can be compared to how iron filings sprinkled on a sheet of paper suddenly jump and line up on the magnetic fields lines when a bar magnet is placed under the paper). The same phenomenon occurred for the execution of Oklahoma City bomber Timothy McVeigh. His execution was originally set for May 11, 2000, but an unexpected development occurred when it was revealed that the FBI had not properly released all relevant records having to do with the McVeigh case. Attorney General John Ashcroft ordered a one-month delay in the execution to sort that out, moving the date to June 11th. *This all occurred precisely because a Mathestry alignment had to occur, so that things aligned with the calculation that specifically determined his execution event.* This law is about purposefully creating the major world events. I can tell you that after following this pattern in a daily immersion for 13 years, what always happens is that the worst stories clearly show the sign of Jones in the Mathestry patterns (bad people named Franklin or Jones, Jonesboro, Padukah, and on and on).

Now return to why Jones has an ending now. Here is his name in MOD26:

**FRANKLIN ALBERT JONES<sub>26</sub> = 206 = 2006 Ending**

The number **206** is one of three *Mathestry* codes for the year **2006**. This shows Jones to have a “2006 Ending.” He should have stepped down already, but he now is pushing forward into **2007**, and this can only happen if his number ending pattern steps up by one.

But to step up by one, which does happen in *Mathestry* and news stories (for example the Kashmir Earthquake), one has to be “going up to the whole number one level,” linked to the Supreme Being. Let’s see the (archetypal) 2005 Kashmir Earthquake example to illustrate how it works (read the bottom level first, then the top, where whole number one is added; this kind of process is how major news stories get created):

**EARTHQUAKE<sub>26(1)</sub> = 108 = 10/8 = Date of Kashmir Megaquake**

---

**EARTHQUAKE<sub>26</sub> = 107**

What we are seeing on the bottom level is the “discrete calculation” (“discrete” meaning that we added up many distinct letters, a discrete collection of letters that form the word). We then go to the “whole number one level” above, by adding **1**. Now propose to do this with his name:

His claim would be that he can “*go to the whole number one level;*” but he cannot, because that is associated with the Supreme Being! His “ending” must be, at the minimum, that his life as cult guru with any people is *OVER*. By giving it up he can “absorb” this ending. He can only continue to live if the Supreme Being grants him a special dispensation, and he has to earn this by performing the act Darth Vader does in *Star Wars*.

It is another *Mathestry* observation to see his name “Beloved Adi Da” to be an obvious exposé with the BAD initials. Would the actual Supreme Being have a name like this? Obviously not.

### **Exposing the Near-Death Experience**

The near-death experience is another major delusion people experience; one that gives a totally false view of what supposedly “happens after death.” I know this will shock you, but in not one case has a near-death experience revealed the true nature of death. None of these events have *actually been death*; permanent, the actual death event. Some may enter a suspended state for a very long time (an enforced ‘yogic suspension’-type event created by the Kundalini-Shakti), but they do return. What happens at actual death is at a right angle to what happens in a near-death experience. In the near-death experience, people experience (usually) going up a tunnel and approaching a great light, etc. This light is coming from the higher cosmic levels, probably the causal level. Light is the inverse and deluding state, and is the state of Consciousness (when you are inside this it seems like “Consciousness;” when you look at it from outside, it appears as “Light”). That light is yellow to the sight of the Supreme Being, but seems “white” to the person being deluded by the experience of it. One can tell these experiences are false because of what so many people report they heard, were told, or experienced. They are contradictory, even absurd, and involve things that are exactly at odds with the views of the actual Supreme Being. The Consciousness state is very deluding, and very powerful. It can “do all kinds of things,” and even “knows all kinds of things” (compare to how the KGB fit those descriptions, gathering sophisticated intelligence, wielding great powers, etc., but you would not view them as being “great” because of it).

Let’s look at another example. A man named Thomas Benedict had a near-death experience and reported this:

I asked God: “What is the best religion on the planet? Which one is right?” God said with great love: “I don’t care.”

See? How absurd is that? The actual Supreme Being would *never* give such a flip and totally bogus answer. It is not that the question could have been answered with the identification of a single “true” religion, but a real answer would have been something like this: “Actually, all of them are wrong in their details, but it was supposed to be like

that during the photographic negative period, and you don't need to worry because everyone is rewarded with Heaven. Just be good and do good. The most important thing is to not be worried about things like 'going to Hell,' 'being reincarnated,' and so on. I am sorry for your suffering, and that you will have to go back to that life for a while longer. Your sacrifice there helps create the Perfection of Existence, as you will be shown when you actually die, at which time I will see you again." Although, such an event would not happen; only those who actually die go instantly (not up a tunnel) to meet the Supreme Being, and then become the Heavenly Being.

And yet Mr. Benedict says he experienced "great love." Now compare this to the fact that Jones describes these (cosmic) states of being as "love-bliss" (note the negative sign, the hyphen, which he himself uses). Think about it. The idea of "love" is based on duality; where one being "loves another." For the absolute and truly Infinite Reality, the idea of "love" is not the main issue, per se; not existentially, as the most fundamental essence of the Being. The state and quality of Transcendental Perfection is *greater* than the idea of "love" (but of course also includes it).

People often say they have been "transformed" by a near-death experience. The problem with this is that they have been changed into someone who manifests a deluded state of Consciousness (even if the new model *is* "high performance"), and by being so "good," or "revitalized for life," or "psychically activated," they are actually showing a sign that deludes others into believing in the "truth" of the near-death experiences, and the picture of 'the afterlife' they present. I know this is hard to hear, but it *is* true.

The place any person should be is right here, in the gross awareness, developing intellect and knowledge, living rightly and serving others, in a sensibility of devotion to the Supreme Being and Heavenly Reality, and to our future. Everyone knows what the right thing to do is. Just do that. Stay in your body and be here, not elsewhere, because any "elsewhere" is the cosmic nightmare waiting to delude you through false experience. The Earth and brain provide the option to not have to do that. And stop trying to "feel oneness," "lose your ego," and so on.

### **Our Solar System is Overwhelmingly Inverted and Negative**

Let's now see further proof for the negative nature of our own solar system (various others have different laws). Always think in terms of the observer, and what the observer sees. Looking down from above our solar system (the "North," or top, and thus senior direction) what we see is that all of the planets revolve around the Sun in the counterclockwise, or negative direction, and that they also rotate counterclockwise on their axes.

This is therefore true for the Earth. Our Sun is a yellow (the color directly associated with Consciousness) dwarf star, and thus has had an "all midget cast" on the Earth, precisely because of the domination of Consciousness. (As a note about yellow being associated with Consciousness, we see this in the news all the time when bad news stories display the link; for example, a yellow Ryder truck was used to bomb both the World Trade Center in 1993 and the Oklahoma Murrah building in 1995, the man who did the recent

school shooting in Colorado drove to the school in a yellow Jeep, Britney Spears wears sunglasses with yellow lenses—the list goes on and on; and note the “yellow brick road” to the fake “Wizard of Oz”).

The name of our star is SOL, and we all know what it means to be “S-O-L.” The Earth is the densest planet in the solar system (and thus, we are “the densest people,” historically). Further, the year is 365 days, and in *Mathestry* this spells CON (MOD9), showing there to be “a Con all year round,” which means the domination of Consciousness. In general, this solar system is a negative place, and history is a long tale of human suffering. And yet all of this has Providential purpose, because it is right here (on this special and particular planet) that we are playing out exactly the pattern that displays the “tests” and proofs about what constitutes Perfection, and Good, and what does not. The Earth is in unique service to the Heavenly and Supreme Beings. This planet is the most important one in the whole universe.

### The Crucial Understanding about Whole Number One

What I am now about to show you is crucial. Don’t let anything stand in the way of your understanding it. I want to say right away that everyone is going to understand what I am about to say, even if they have “math phobia.” Just forget all that and use your common sense.

Mathematicians have made a major mistake in their basic conceptions and definitions about number. The way they currently think is that all numbers originate “on the number line,” in which numbers are shown in the negative and positive directions, opposite states relative to the “origin,” or 0:

We have to be clear about what these signed numbers are. They are the opposite state numbers called the integers. But think about this: Doesn’t common sense say that whole numbers, without signs, come *before* these numbers? Wouldn’t we have whole numbers first (like we use in counting, 1, 2, 3, . . . , etc.), and then, secondarily, add signs to them to create “opposite state numbers” (-1 polarized with +1, -2 polarized with +2, -3 polarized with +3, etc.), as displayed on the geometric number line? Now here is the stunning fact: *this is not how any mathematicians think!* They simply draw the number line and go from there. They have actually missed the very foundation of mathematics.

So here is the key. To a mathematician, whole number one, **1**, with no “+” sign present, is “just the same as **+1**,” because “they have the same numerical value.” In others words, we can write:

$$1 = +1$$

This *is* true *relative to numerical value*. But the two numbers must be seen as originating distinctly, and having distinct purposes, for the following reason.

Remember that everything in the true system is based on the presence of the observer (the very thing that has specifically been banished from mathematics, through its entire 5,000-year history). An observer does counting as his first mathematical act with number. If you place three marbles on the table and count them, you say, “1, 2, 3,” and this has nothing to do with signs, or opposite states. These counting numbers, the whole numbers, do not originate “on a number line,” but instead originate in the thought of the observer relative to the act of counting. (All academic mathematics is unalive, atheistic, and abstracted, and therefore excludes this kind of understanding.) In fact, *this counting in thought is the actual and correct origin of number, as originally occurred in the mind of the Person of the Supreme Being, Lord Shiva*. These whole counting numbers come first in thought, and are then *secondarily* applied to an “opposite states number line” (where number is thus made *geometric*), in the form of new “signed numbers” we call “the integers.”

There are therefore three forms of “one:”

$$\mathbf{1, +1, -1}$$

These numbers have existential reality, as states of the Supreme Being and cosmos. In terms of number, whole number one comes first, while “positive one” is a secondary geometric number that is distinct, but which shows equality with whole number one relative to the category of *numerical value*. Then, the number -1 specifically *does not* share this equality with whole number one. It is most helpful to show these three numbers like this:

$$\begin{array}{r} \mathbf{1} \\ \hline \mathbf{-1 \quad +1} \end{array}$$

What we then find out is that the state **Pure Energy** is the Providential whole number one state, **1**, unique to the gross universe, such that things like opposite electric charges (e.g., the -1 electron and the +1 proton) come secondarily out of that pure energy state. All physics is made from that whole number one state, *and this is a form of the very essence of the Supreme Being*. Therefore, we realize that the Supreme Being is, mathematically, a Whole Number One state (but not “merely a number”). Now reexamine the top of our earlier diagram:

$$\begin{array}{l} \mathbf{Heavenly Being = \infty} \\ \mathbf{Supreme Being = 1} \end{array}$$

Then, moving downward in the cosmos, the fourth primary level, our gross level/universe, unlike the other cosmic states, has whole number one at its basis, but with a built-in conflict with -1:

**Heavenly Being = ∞**  
**Supreme Being = 1**

---

**Supracausal = -1**  
**Causal = -1**  
**Subtle = -1**  
**Gross = 1/-1**

For the gross universe (our universe), whole number one comes first as pure energy for physics, but then life is primarily in the -1 category as the cosmic pattern steps down and intrudes into the gross level. Here is how the basis for each actually ends up for the Earth:

**Physics    Life**

<b>1</b>	<b><u>-1</u></b>
	<b>1</b>

We again see the duplex model for life on Earth, where -1 is (currently) in the senior position. Thus, for life on Earth, whole number one, 1, and -1 are locked in mortal and archetypal combat (the correct view is to see it as a war; that is why AWARENESS involves “A WAR right from the beginning,” but also “gets an ‘A’ right from the beginning”). The battle between these two forces is what has made history (an angel on one shoulder, the devil on the other).

The Supreme Being is only about what is GOOD. Now, acts of *contraction* and *expansion* are fundamental to Observer Mathematics, active in both physics and life. The contraction of the word GOOD becomes GOD (a bad word, not to be used), and this lands in the supracausal level, the top level of the cosmos (inside the cosmic basketball):

**Supreme Being = 1 = GOOD**

---

**Supracausal = -1 = GOD = BAD/EVIL**

This is why Franklin Jones, the first and only realizer of the supracausal level (but he thinks it is the ultimate reality), says he is “the God-realizer,” and took the new name “Beloved Adi Da,” with initials BAD (that’s *Mathestry*, making all of this word patterning of history come out perfectly). Through the words, we see that “God is less than Good,” and this corresponds with the history of religions exactly. “God” is the -1 internal overlord of the cosmos, oblivious to the actual Supreme Reality beyond the cosmic boundary.

Despite all of this criticism of the Eastern religions, we do need to give special recognition to Hinduism, which does have true and noninverted elements through the Intentions of the Supreme Being. One of Lord Shiva’s favorite statements is:

***Reality is a Hindu Reality***

We saw how the sound “OM” was correctly and meaningfully recognized in that tradition. The other key tradition of Hinduism is devotion. The religious sensibility that goes with such words as *devotion* and *service* is the correct viewpoint, as would be endorsed by the Supreme Being. (This is the quality in you that Lord Shiva most admires, and seeks to have liberated from false application.) The fundamental idea of giving support to the teacher is also valid and appropriate, as that person has major and unique obligations, and has provided a major gift.

### **The Moebius Strip and the Dynamics of Human Attention**

Now here comes one of the most important things you will ever see explained. There is a mathematical state that causes all human attention to alternate between Providential states [whole number one (1), or the lesser +1 state], and false -1 or 0 cosmic states. This occurs via the Moebius Strip (a simple mathematical state discovered by the mathematician August Ferdinand Moebius in the nineteenth century). The Moebius Strip can be displayed with a simple strip of paper. I want to show you how to make one right now; it is working in the energy of your brain and mind all the time. Don’t skip the step of actually making one.

Gather together the following objects: a normal sheet of white unlined paper, a pair of scissors, some scotch tape, a pen (with blue ink, if possible), and a yellow colored pencil (if possible). Cut a strip of paper  $\frac{3}{4}$  of an inch wide by 11 inches long up the side of the sheet. Hold the strip in your hands and examine it. It has two sides, and those sides face opposite to each other. Now place the sheet on the table oriented left-to-right. Take the pen and write centered along the top face the numbers 1 and +1, followed by the word “Awareness,” like this:

**1/+1 A W A R E N E S S**

Notice how I spaced the letters out a little, so the word stretches along a large portion of the strip (but leave at least an inch on each end). Then, write capital “T” (for “top face”) at each end, so that what you see looks like this:

**T 1/+1 A W A R E N E S S T**

Next, turn the strip over and write the following on the bottom face, using **B** for “bottom face:”

**B -1/0 C O N S C I O U S N E S S B**

Color the Consciousness side with a yellow colored pencil if you have one. Now pick up the strip and hold it so the bottom face faces upward. Then curl the strip until the two ends meet. This just makes a plain circular band or loop, but that is not what we are making. What you need to do next is to flip the left end over so that instead of **T** you see **B** facing upward. Then scotch tape the two ends together (one **T** and one **B**). This is a Moebius Strip. It is an object that started out having two sides, but which now has only one side! To see this, hold the strip at the scotch tape point so that it is between the thumb

and first two fingers of your right hand, and then with the other hand move it through your grip so that the word “Awareness” begins to travel before your sight. You will find that the state then suddenly flips and that the word “Consciousness” is appearing. This is the true and unrecognized dynamic of human attention. Everyone’s attention alternates between Providential 1/+1 states (thoughts, ideas, interpretations, emotions, conclusions, intuitions, etc.) and  $-1/0$  cosmic states [always false, inappropriate, out-of-touch with reality, deluded (apparent to others, but not recognized by the person), imaginary only, emotionally negative, etc.]. Personal growth occurs when you take the position of the senior observer, watching all that goes through and disciplining the errant material when it arises (but you have to know what is errant, and this involves aligning with the Lord’s personal and aesthetic views, something Jones or Cohen take you away from, and distort). Because the strip is only one sided, it gives us the illusion that there is only one stream of the person’s thoughts (“I am one self,” “I am one person,” etc.), but everything can actually be categorized according to this dual state. You can observe people and see them suddenly flip their qualities as their attention moves along the Moebius Strip. You can see it in yourself. What Jones is trying to force you to do is to park the Moebius Strip in the Consciousness position all the time, *the very opposite of what you should actually be doing!*

### **The Truth about His Attack on “the Ego”**

The word “ego” has been totally misunderstood by everyone. Starting with Freud, this word has been adopted by psychologists and consciousness practitioners as referring to “the limited (or bad) self” in some way. People say that someone “sure has a big ego,” to be derogatory. The word itself, however, was actually coined by the Supreme Being to refer to the Providential part of each person, the Ego Structure (Sigmund Freud, a mirror form, copied the word and abused it, and so has everyone else). It is *this* aspect of the person’s makeup that shows the Divine sign. This occurs when the person does what is good and right, especially through a primary role in life involving work and service to others. Human life is ordered (on the mass level) by the Ego Structure of Humanity, in which impulses toward, and capacities for, certain jobs (and more) manifest in the right people, which makes sure everything gets done. Awareness always works through the Ego Structure. When the Awareness side of the Moebius Strip is present, Ego Structure is present. The Ego says, “I am a Person.” For the Ego Structure of the human person, good mind and good emotions exist in identity.

The opposite mind, however, is the inverted cosmic consciousness mind, symbolized by the state  $-i$ , which stands for both *inverted* and *imaginary* (and this is directly linked in the mathematical system to the imaginary number, the supposed “square root of  $-1$ ,” symbolized as  $i$ ). This human state of  $-i$  splits as  $i$ , the *imaginary essence mind* (which always says, “I am my Self,” or “the Self,”), and  $-1$ , the *negative essence emotions*. This is always Narcissus. When someone is an ‘arrogant jerk,’ for example, we must say, “He sure is a big Narcissus,” rather than “He sure has a big ego.” This language error is of mythic importance. The Ego (properly defined and understood) is the Good Part of You! **And that is why Franklin Jones and all of these Consciousness teachers go after it, demanding that it be destroyed!** He says, “transcend the Ego-I,” and I say, “Realize the Ego Structure;” you will then become a great, functional, and religious human being.

The Ego Structure gives you definition as a focused, present, functional, relational, and specific person in life. Consciousness and Narcissus create a defocused, abstracted, dysfunctional, and unrelational self. When Jones trashes “the Ego that makes you separate,” he is trying to tear down the very thing the Lord Graced you with for your life; being the person that you are. Your sensibilities are distorted into thinking you should “dissolve” this, and work *against* the actual Supreme Being!

This inverse cosmic mind is intransigent and evil. If you can, watch *Star Trek II: The Wrath of Khan* to see a perfect depiction of the mentality of this being, as portrayed in the character Khan, (decode the name “Khan” as being, “Con,” or Consciousness; this was intentionally created by the Supreme Being). Watch especially the final scenes of Khan, and note his attitudes. That is the *supracausal* mind, incarnate in Jones.

### **More on what is Wrong with Jones, and His Teaching**

Things “show their sign,” and I am sure all of you know and understand that. You have been taught to rationalize away Jones’ bizarre behavior over the years (drugs, sex outrages, verbal abuse of people, and on and on). You should have been outraged when, as just one example, he demanded that devotees raise \$60,000 for a Pinocchio lithograph, and you should have been very perplexed at why “the Divine Lord” would want to display the sign of a character whose nose grows because he is lying! And yet the connection is not surprising, given that NOSE is anagrammed in JONES. In other words, for him, it is an issue.

Why is it that so much of the “technical language” he uses involves hyphenated phrases, thereby repeatedly forcing the appearance of the negative mathematical sign into them? Examples:

**God-Man**  
**Heart-Master**  
**Love-Ananda**  
**World-Teacher**  
**Feeling-Contemplation**  
**“Moksha-Bhava-Nirvikalpa-Samadhi”**  
**etc.**

See? This is exactly like his displaying the initials B.A.D. He is negative, evil, and inverted!!

Compare this to what I have presented here, in which hyphens never appear in the primary names, titles, etc. (in regard to the great matters of Existence itself).

There is one more *Mathestry* point about him to mention here. First, write this:

**Franklin Jones**  
**Jim Jones**

The fact is that Jim Jones was a “sidecar” of Franklin Jones’ real (*supracausal*) state, shifting it away from himself so it is not seen by the devotees or public; but still, like a flasher, revealing himself by aligning with the same name, Jones (one devotee described, in writing, the dream he had the night before Jonestown, in which Franklin Jones came out of a jungle, his mouth dripping with blood).

Now write this:

**Adi Da  
Franklin Jones**

There are two “first names,” and two “last names.” Write the top first name with the bottom (original) last name:

**ADI JONES**

Now *Mathestry* goes to work to show the hidden truth relative to two historical figures. To begin, anagram the first name (a step of “decoding”), and put the statement in the MOD9 frame:

**AID JONES<sub>9</sub>**

Now underline the **A** and **D** of the first name:

**AID JONES<sub>9</sub>**

Then recall the MOD9 chart:

***Mathestry Alphabet Chart in MOD9***

---

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>
<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>	<b>E</b>	<b>F</b>	<b>G</b>	<b>H</b>	<b>I</b>
<b>J</b>	<b>K</b>	<b>L</b>	<b>M</b>	<b>N</b>	<b>O</b>	<b>P</b>	<b>Q</b>	<b>R</b>
<b>S</b>	<b>T</b>	<b>U</b>	<b>V</b>	<b>W</b>	<b>X</b>	<b>Y</b>	<b>Z</b>	<b>0</b>

The underlined letters are then dialed like the side of a Rubik’s Cube, so that **A** clicks to **J**, and **D** clicks to **M**:

**JIM JONES<sub>9</sub>**

This shows the true link he cannot hide, relative to a major historical figure in the news.

## Exposing Andrew Cohen

There is an instant exposé of Andrew Cohen as well. His home (purchased in an absolutely shocking way) is called:

**“FOXHOLLOW”**

Now write the MOD9 values for the first three letters, and write as follows:

**FOXHOLLOW<sub>9</sub>**  
**666 HOLLOW**

The number 666 is directly associated with the inverse mind (not “because it is used in the Bible,” but for other more direct reasons). The sign of this number routinely appears relative to people who are negative or evil, as *Mathestry* orders the patterns. I have seen this countless times in news stories, and in personal experiences.

Further, the presence of the word “Hollow” is also an exposé, because this is a technical Observer Mathematics and *Mathestry* term that refers to *empty space, which is always mathematically equal to 0*. In cosmic terms, while Jones is the  $-1$  medium state, Cohen is a *void* state, based in 0. Therefore, flee!!

These two, clearly negative signs would never be associated with a true teacher of the nature of reality. Andrew Cohen’s cult must be completely disbanded, immediately.

Andrew Cohen is a very sinister figure, and must be fully exposed for the fraud that he is. His own mother, who tried to be his devotee, finally fled from him, and wrote an entire book to expose him. For a summary article about her life and the book see this website: [http://www.scp-inc.org/publications/newsletters/N2203/mother\\_of\\_god.html](http://www.scp-inc.org/publications/newsletters/N2203/mother_of_god.html). This man uses verbal assaults, physical abuse, psychological intimidation, and much more. All people involved with him must stop rationalizing his attempts to “confront your ego,” etc. They are a cover for his Nazi pattern. The following fact is no “mere coincidence:”

**ANDREW COHEN<sub>9</sub> = 56    ADOLF HITLER<sub>9</sub> = 56**  
**ANDREW COHEN<sub>26</sub> = 110    ADOLF HITLER<sub>26</sub> = 110**

In doing a formal *Mathestry* analysis, such correspondence is not automatically meaningful. We require external proof or evidence for this as well, and easily find it in his case, given the shocking stories told by ex-students, which are not in question. Also, note his black mustache. ## **How I Attained this Realization, and the Personal Cost**

I could never have anticipated that I would go through this process of discovery and realization. The whole process has taken 23 years, but is fundamentally completed. I have discovered the truth about all of the following primary subjects, and discovered other original material never seen before. Here is a partial list:

**The Actual Nature of Reality**  
**The Truth about Religious Practice and Life**  
**The True Mathematical System of Existence**  
**The True Scientific Understanding of the Universe**  
**The Moebius Strip and the Dynamics of Human Attention**  
**The *Mathestry* Law**  
**The Coding System of Nostradamus**

It has simply never occurred before in human history that a single person has realized the actual truth about so many primary things, all at once. Under the crushing systems and laws of life we have here, it is a near impossibility to do so. As my realization magnified to complete clarity overall (and the many thousands of specific details), the price that had to be paid became extreme. How was I to absorb the  $-1$  life states of the Moebius Strip? Existentially, and by force, the only way was to (1) live in isolation when I am normally a very relational person, (2) live in abject poverty, and (3) live in terrible living circumstances (living in 10 different places, an ordeal from which there has never been a single break in 13 years). I have been celibate and uninvolved with any women for well over 10 years. All of this is what had to happen during the formal “inverse precursor period” of my life (the payment required, in other words), which precedes the upcoming Proactive Creation period. At this point, my health is failing. I am exhausted beyond belief, and have no pathways out of this whatsoever. I truly need your help.

You may or may not be aware of just how bad our systems are (academic, government, media, publishing, etc.) I have sent over 12,000 letters in every conceivable direction, seeking funding for my scientific work. None have ever received a reply, or led to an examination of the material. Unless one is a university professor, there is no hope whatsoever for attaining funding from any of our systems, or people of means, or anywhere else (not without contacts). Whether it is the media, the academic system, the government, literary agents and the publishing world, etc., what one finds is total meltdown and very bad people running the show (I have had three literary agents over the past three years, and all turned out to be corrupt, incompetent, or even a formal scam). There is simply nowhere for me to go.

In presenting this material for you here, I seek to liberate you from Franklin Jones, Andrew Cohen, and/or the whole “Consciousness” movement mentality. If you see what I am saying, I ask that you consider providing any financial support for me that you can. I have six major books (EBooks) on my main website, [www.markprovo.com](http://www.markprovo.com) that you could buy. I also have PayPal buttons there for contributions. Right now I am trapped in an extremely rural environment (where I would normally never live), with no car, and all ad hoc funding for survival now exhausted. I must escape from here and get to a proper

geographical location with the appropriate infrastructure. I was surprised that Lord Shiva wanted to reveal his name and presence in all this (a project unexpectedly placed in my lap on January 12, 2007, the day after Jones' "emergence day"), but the hope is that you will recognize the importance of the true realizer being saved and supported. It will be astounding to everyone what I will produce if I have the money to develop the proper infrastructure for website, books, audio, video materials, and so forth. Jones (and Cohen) have all of this when they shouldn't, and I have none of it when I should.

One of the most significant things I will show is the secret structure of history, all determined mathematically, and relative to 25 Providential people in history (none of which are "religious figures").

When I did have one chance to present my work to a scientific and technical audience, at a private research company near Seattle on January 25, 2006, the result was near pandemonium and a standing ovation at the end (in fact, they extended the planned two-hour event to six-and-one-half hours, to 10:25 p.m., due to their extreme excitement and interest). I have long been known as an outstanding teacher and presenter, but no one knows about me yet. The time has now come to end this long period of waiting, and for me to be heard. People would actually really like me, as everyone always has.

There were two bad things that recently happened. The first was that a private benefactor I had just located through a personal referral had all of his money embezzled by a crooked lawyer, just as I was moving and about to receive the money. The end result of this fiasco was that I ended up in an extremely tiny motel room, first for six months in San Diego, and then after a move on a Greyhound Bus to an even tinier motel room in rural Washington State, where I was trapped for 32 months and 9 days.

During the time in the Washington motel room, on November 22, 2005, I had a knock on my door by a feature reporter from the *Oregonian* newspaper, a strange man named Tom Hallman (the fact that he arrived on the anniversary of President Kennedy's assassination was a bad omen, but I had no choice but to go forward; this has added significance because I have President Kenney's birthday, May 29, and was born while he was President). Hallman had heard about me, and thought my story would make "a good feature story." The problem was that he is a self-described "math idiot." After a five-month ordeal of dealing with him the article finally came out, on the front page of the Sunday paper, on May 7, 2006, and the result was a complete disaster. He totally fictionalized my life and work, got all the math wrong, never quoted me even once, never quoted the people who know me that he interviewed multiple times in each case, and as it turned out only one small paragraph in the very long "article" was actually correct. I had to post a line-by-line refutation of the whole article on my website. Instead of this being my "big chance to be heard," the result was the ruining of my reputation on the Internet, because self-appointed commentators took it upon themselves to post false comments about me and my work, based only on the false article, and without having known me in any way, or even contacting me by email. I have been hanging on by a thread ever since, and the time has come where my work must become known to people who can appreciate it. This overall community is the right place, and so here is this document.

## **Final Comments**

I resisted taking the step of producing and providing this document because I know it may be that I receive abuse or worse from forum posters, etc. I do not deserve that kind of treatment, and ask that you please be respectful. Reasonable questions or comments are one thing, but flip attacks and superficial characterization (or mischaracterization) of what I have said, are another. I ask that people be kind. I will respond to emails or some forum postings if they are respectful and reasonable. I did this not just in hope of being liberated from the nightmare I am living in (which exists only because of a lack of money), but also because I sincerely care about people having the correct understanding, and not having to live in a state of delusion within a negative, mind-control cult, or under the influence of false “spiritual literature.” I ask anyone who can to please forward this letter, or a link to it, to people they know within the Jones community (and other such groups), and others who are generally involved with these issues.

Thank you for your time,

Mark
